

Quality + Inspection

Turn critical requirements into agreed inspection evidence.

Manufacturing reference. Material records and the order specification establish the actual grade and supplied scope.

01 / Define what acceptance means

Identify critical characteristics, datums, drawing revision and final part condition. Separate dimensional, cosmetic, material and functional requirements.

02 / Agree how it is measured

Specify CMM, gauges or other suitable methods where needed. Discuss access, fixtures, sampling and measurement capability for the actual features.

03 / Request useful records

Agree report format, measured characteristics, lot/serial identification, material certificates and any test records. Published company certificates are separate documents.

Use with the released drawing. The quotation confirms capability, responsibilities, price and timing for your project.

Your quotation checklist.

Share what you have. Identify the open decisions before the part is released.

- ☐ Released drawing and controlled revision
- ☐ Critical-characteristic list and datums
- ☐ Final measurement/finish condition
- ☐ Method, sampling and acceptance criteria
- ☐ Report format and traceability requirements
- ☐ First-article/sample approval and packing plan

Agree the acceptance package.

1. Match report revision to the order.
2. Check characteristic IDs and measurement units.
3. Agree treatment of deviations before shipment.
4. Keep material, dimensional and test evidence distinct.

Confidential drawing? Arrange an NDA before sharing sensitive files. Begin with a general component description if needed.
